

The 4-Prompt System

4 Prompts to Run Your Content on Claude

Four prompts that turn Claude into a repeatable content system. No setup cost. No guesswork. Just paste and run.

I run my entire content workflow on Claude. Four prompts. Every week. Here is the system.

PROMPT 1 — FIND WHAT ALREADY WORKS

```
"Analyze the highest-performing posts in [my niche] from the last 30 days across [Instagram / TikTok / YouTube]. Identify the repeating hooks, the formats, and the one emotional trigger they share. Rank the 5 strongest angles by save-to-like ratio, highest first."
```

PROMPT 2 — WRITE THE HOOK BEFORE ANYTHING ELSE

```
"Give me 3 hook options for [topic] on [platform]. Lead each one with a number, a name, or a surprise. Then run the first-3-words test: read the first 3 words of each hook alone. If they don't create curiosity on their own, rewrite. Cut any hook that opens with filler."
```

PROMPT 3 — TURN THE HOOK INTO A SCRIPT

```
"Take the strongest hook and write a [30]-second short-form script. One idea. Short sentences. Put an open loop between each beat so they keep watching. End on a soft call to action that fits [platform]."
```

PROMPT 4 — MAKE IT A SYSTEM, NOT A ONE-OFF

```
"Wrap prompts 1 through 3 into a repeatable weekly workflow: Monday find the winners, Tuesday draft 3 hooks, Wednesday script it and check it against my rules, Thursday batch and schedule. Save it as a named instruction so I run it by name next week instead of starting from scratch."
```

Prompt 4 is the one most people skip. A prompt runs once. A system runs every week. That is the difference between using Claude and building with it.

Follow [@build.inquiet](#) if you want the version that runs itself.
